

Gord Miller, B.Sc., M.Sc.
Commissioner

Gord Miller, B.Sc., M.Sc.
Commissaire

November 24, 2010

To Whom it May Concern:

I met Ivan Milin at one of my speaking engagements this past August. He invited me to visit him at his facility in Guelph and I took him up on his offer. Frankly, I found his technical concept intriguing. He set up a small demonstration for me and then explained the principles of his proposed prototype technology. I was very impressed with both his innovative thinking and his obvious practical engineering knowledge and experience.

We need more people to think "outside the box" if we are going to find effective and practical solutions to our environmental challenges. However, it has been my observation over the years that small firms such as EcoSpace Engineering often find it difficult to make the leap from successful prototype to full commercialization. The obstacles are many and they are often daunting. Although I have no way of knowing whether or not the "Milinator" will prove to be a valuable addition to our growing Canadian inventory of "green" technologies, I do feel that Mr. Milin's work shows considerable promise and I therefore support his attempts to access financial and/or technical assistance as his company moves from the concept stage through to market-ready product.

Sincerely,

A handwritten signature in black ink, appearing to read "Gord Miller", with a long horizontal line extending to the right.

Gord Miller
Environmental Commissioner of Ontario
